Public consultation on EU energy policy

Give your opinion to the EU commission's Green Paper on energy before end of this week!

The European Union has to do much more to set the pace of a sustainable and climate-friendly energy policy. Embracing renewable energy sources, energy conservation and energy efficiency are absolutely mandatory to achieve a global energy revolution. This means also that the EU should be **phasing out polluting and dangerous technologies, like nuclear energy and coal.**

This is **your chance to tell the European Commission what kind of energy future you want.**

We are committed in changing their minds and **we need your help!**

You can find the on-line questionnaire below in several languages:

[Link to the questionnaire](#)

Or more easily, you can find a four-steps-approach on Friends of the Earth Europe (FoEE) webpage [Earth Europe](#).

Or also on the [Greenpeace EU Unit blog site](#).
